

## **M215 HW2 (Due Thursday 10/18/2018 at 11:00 AM)**

**Problems from the textbook:** 3.2(e), 3.4, 3.6,

### **Additional questions (continuation of Exercise 3.4):**

- (a) Under the exponential model, estimate the 12-month relapse rates in both the 6-MP and the placebo groups and test if they are significantly different.
- (b) Perform a graphical check of how the exponential model fits this data for the 6-MP arm.
